The Ultra Plus is the new dimension of the Azoogi Strip Family. Featuring 29W/m of pure power, with a unique average lumen efficacy of 140lm/W without any compromise. Along with its incredible brightness in any aluminum profile, the Ultra Plus strip also conserves the dotless effect which makes it a high end architectural product. Where in the past two strips were essential for creating this effect, now, all you need is just one Ultra Plus line.

## NEW STRIP

With over 3000 Lumen per metre with high efficiency of more than 140 lumen per Watt

### Mini Strip, Major Versatility.

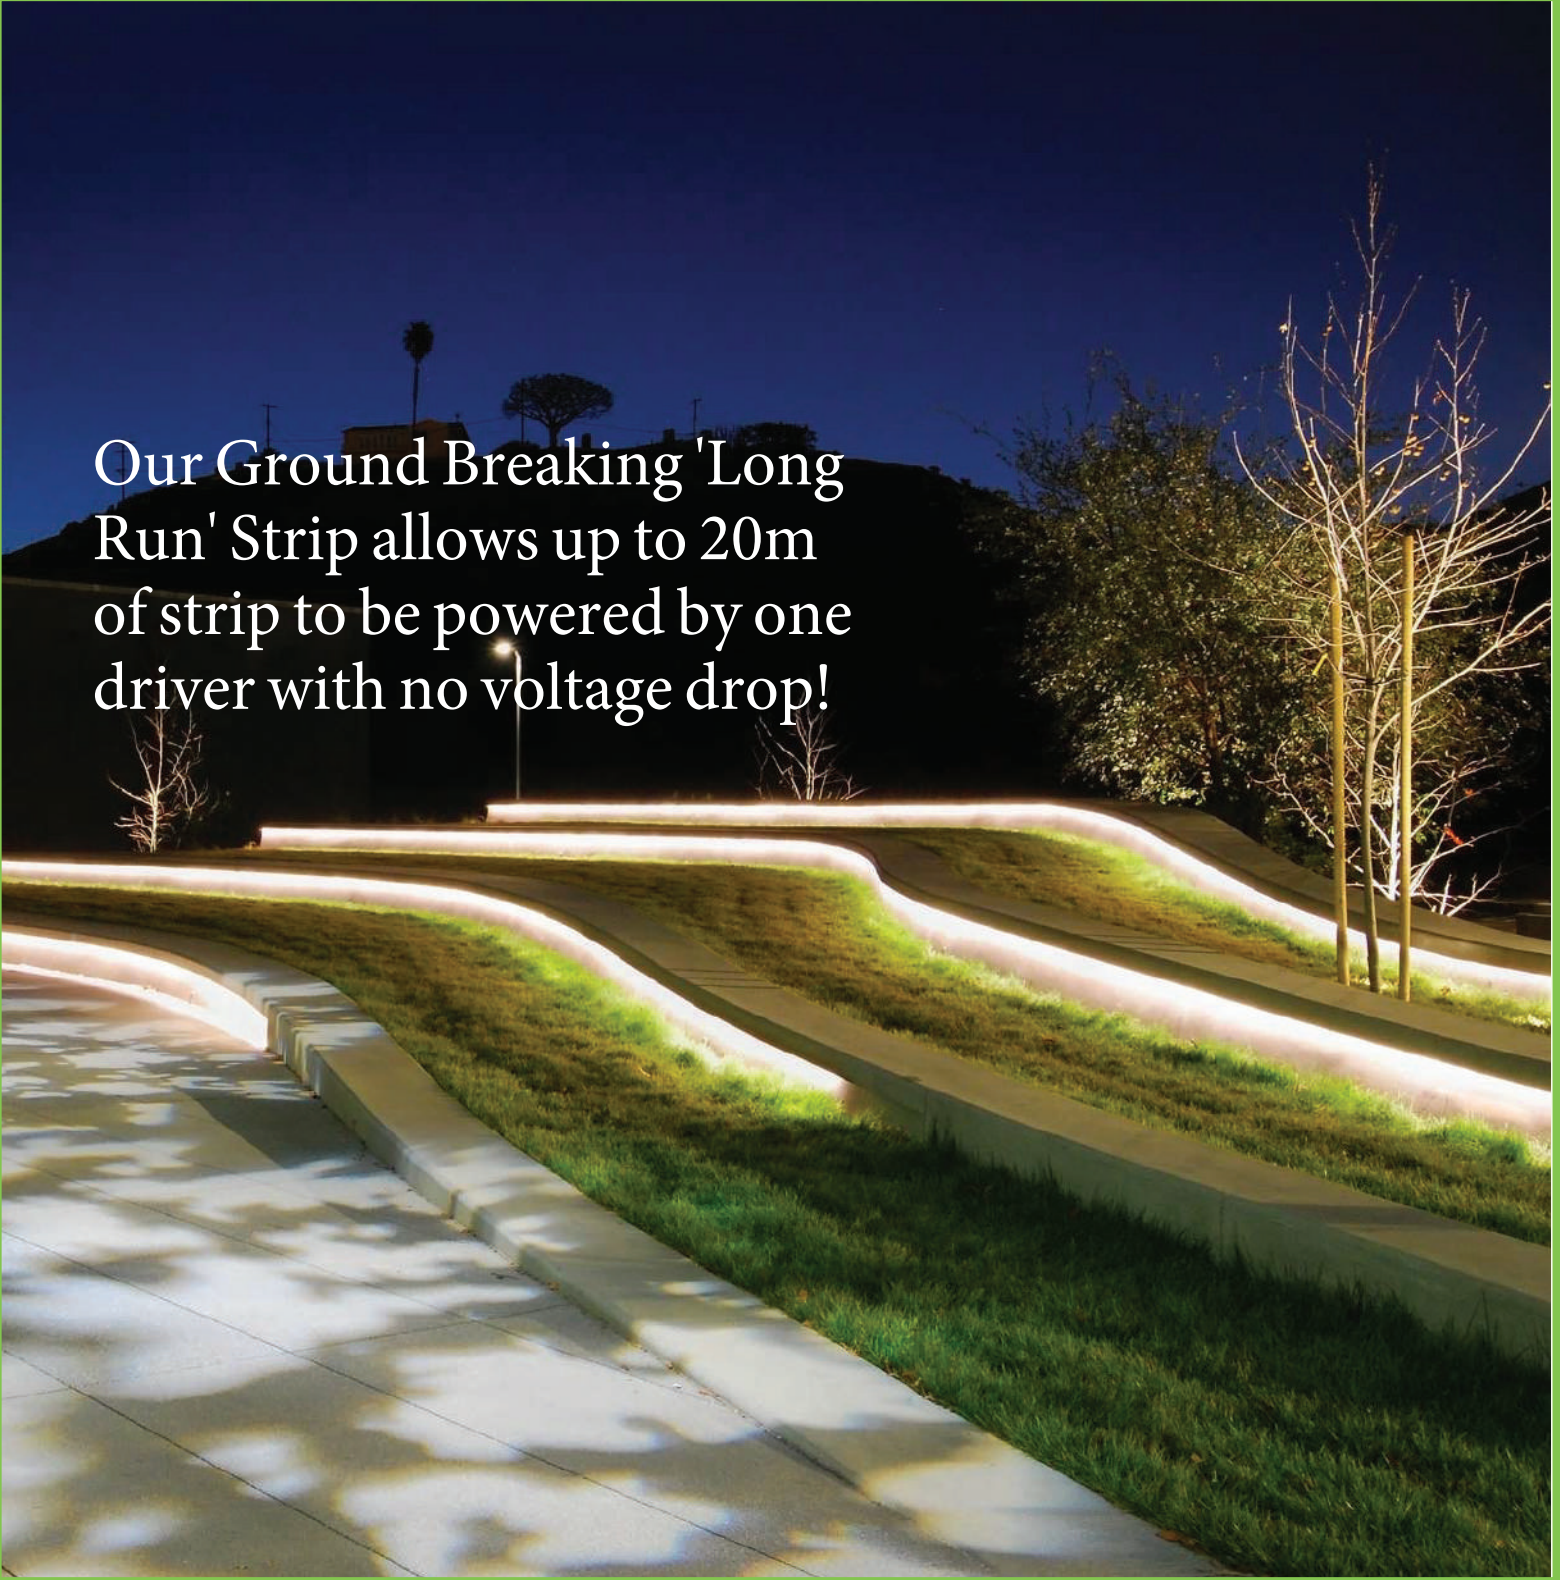

The 9.6W Mini strip and accompanying profile are custom designed to place light in the tightest of spaces. Our mini strip and profile are extremely popular for their reliability & endless applications. A true dot less strip!

*"Minimalism at it's finest."*

*- Dimi Gotsis*

Our Ground Breaking 'Long Run' Strip allows up to 20m of strip to be powered by one driver with no voltage drop!

Here at Azoogi, progress is everything to us. Voltage drop is a real concern in modern applications. Being able to provide a strip that runs brighter, better and longer for our customers is a big deal to us.

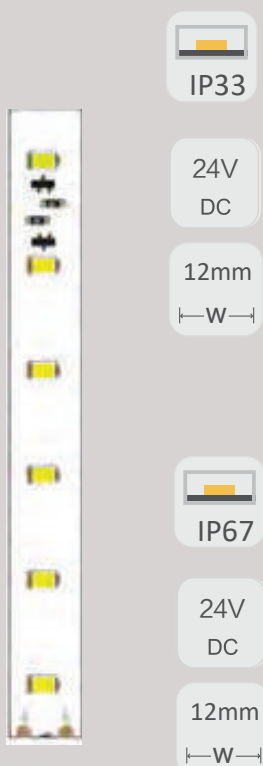

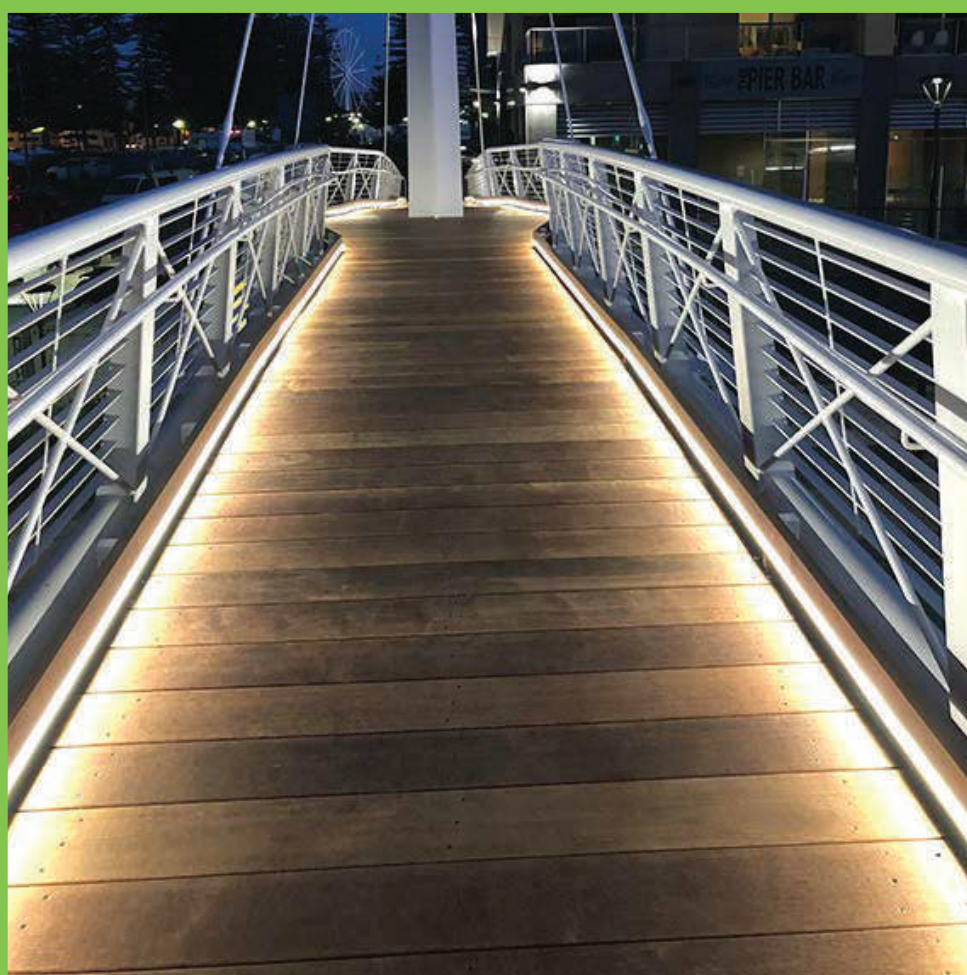

Which is why we'd like to introduce the 20m Long Run LED Strip. The strip has been custom designed, available in IP rated and non IP rated strip. While this strip can run up to 20m on one driver, custom cuts and sizes are still available.

### 20m Long Run 7 Watt - IP67 Strip

#### Features

- ✓ Long run 20m roll only 1 driver required
- ✓ High efficiency SMD LED chips
- ✓ Can be cut to length
- ✓ 20M long strip driven by one end power supply
- ✓ 3M tape backing
- ✓ Fast and easy installation
- ✓ Ideal for decorative applications

# LED Neon Flexible Strip Lighting

## 1. No Profile

Our LED Neon flexible strip is IP 67, powerful, and capable of being installed anywhere without the assistance of aluminum profile or 3m tape backing.

## 2. Flexibility

The LED Neon strip is capable of being installed in some of the more 'abstract' positions. Almost any shape is fine for this strip.

## 3. Uninterrupted Light

Since there is no profile for this strip, its diffuser is built in. Creating a perfectly seamless line of light. **No dots, no problems!**

## LED LIGHTING

### Smart Control Systems

#### 1. RF > Bluetooth

For those that are familiar with the struggle of finding the perfect angle between their controller and receiver, this is the solution you have been waiting for.

#### 2. Reliability

Where bluetooth struggles to provide a user friendly experience, RF technology allows the user to control their strip with no discomfort. The controllers are made of quality materials and come with a 3 year warranty.

#### 3. Range

We have created the most dynamic range of controllers on the market. Anything from a controller that strictly dims, to a controller that dims, changes colour, colour temperature, pre set colour modes and switchable colours built in. We have also welcomed a DMX compatible receiver to the Azoogi family. Allowing our range to extend with no limits as the industry does as well.

*"Higher quality products mean higher quality of life!"*
